We are looking for:

Proteomics Specialist/Scientist Proteomics (m/f/d)

Your tasks:

- Project management in the area of proteomics from planning, measurement, data analysis to reporting
- Development, adaptation and application of bioinformatic analysis pipelines and tools
- Close collaboration with laboratory and analytics

Your profile:

- Study of Bioinformatics, Biology, Biotechnology or similar
- Several years of experience with LC-MS-based proteomics and/or protein analytics
- Profound knowledge in statistics and data analysis
- Structured, analytical and independent way of working

Advantageous:

- Experience with diverse analysis methods (PTMs, targeted/untargeted analyses, protein quantification, plasma proteomics, biomarker studies)
- Practical knowledge from sample processing and instrument handling to data analysis (DIANN/Skyline)
- Programming knowledge (e. g. R, Python)
- Understanding of experimental workflows in a laboratory environment
- Experience of working in a regulated environment (ISO/GMP)

We offer:

- A small team with narrow hierarchies and short decision-making processes
- Early assumption of responsibility and the opportunity to contribute and implement own ideas
- A wide range of tasks with insights into different areas of a biotech company
- Flexible full-time or part-time models as well as the possibility of remote work after induction.
